Needs a better irrigation system to be able to know when to fix soil issues

The location of each plant is very important

Says

The general population needs to be educated on sorting waste / recyclables and reducing urban footprints

Thinks

Has to be careful and international about where he plants his plants

Most of his gardening techniques/tips were learned from reading books

It is important to stategize the location of different plants

Doesn't use any artificial fertilizes

Does Feels

Plants
vegetables
and fruits in
his backyard

Employs
permaculture
principles in
his garden

Ioves farming
Farming
calms him
down

Optimistic -some plants have shown success and more plants might be able to thrive

Passionate about sustainability
